

## **Annual report 2024**

We were able to go to Yangon from 27.04.2024 to 04.05.2024. We have operated 11 children with severe scoliosis in Yangon University Spine Unit.

Because of political instability in Myanmar we decided to cancel our visit later of that year.

Instead, we were able to support Dr. Shein Myint, head of spine unit in Yangon, for his attendance to Scoliosis Research Society annual meeting in Barcelona in September 2024. We donated his air travel, hotel accommodation and Congress registration fees. It was important for him to attend this meeting so that he can apply for the membership of Scoliosis Research Society.

We sent many implants from Zuri Implant Titanium cages, which we could buy with low discounted prices, to Yangon Spine Unit in the year 2024, as we were not able to bring them in person as usual.

We have no plan to visit Yangon this year, but hopeful that we can go in Spring of 2025.

Prof. Kan Min
